

Outbound Sales Case Study – Mohammed Hassan

PURPOSE

Supporting evidence of outbound sales experience, showing how it translates directly into core SDR responsibilities in a B2B environment.

SALES FRAMEWORK

Applied a structured, repeatable call framework – Pattern Interrupt → SPIN-based Discovery → Story / Social Proof → Confirm-Anchor-Ask Close → Rehash – to control conversations and drive conversion across 100+ daily prospect interactions. The same sequence underpins SDR outbound calls: break the pattern, qualify through structured questioning, build credibility, close with a confirm-anchor-ask sequence, and recover gracefully on objections.

PROSPECTING & LEAD QUALIFICATION

- Built target lists using ICP criteria (industry, company size, role) via Lusha and LinkedIn Sales Navigator
- Cross-checked prospects against Salesforce before outreach to avoid duplicate or dead accounts
- Identified and engaged decision-makers across commercial and residential environments
- Qualified prospects through structured questioning and needs assessment before progressing to the next stage

OUTREACH & CADENCE MANAGEMENT

- Built and managed multi-touch outreach cadences across calls, email, and LinkedIn
- Reached full independence on cadence management and dialler tools (Dialpad) ahead of standard ramp time
- Maintained 100+ daily touches while refining sequencing to improve response rates

PERFORMANCE & KPIs

- Generated £162,000 in revenue within five months
- Sustained 100+ daily outbound interactions in a high-rejection environment while hitting KPI targets
- Improved conversion rates over time through framework refinement and faster qualification

PIPELINE & CRM MANAGEMENT

- Logged and tracked all prospect interactions in Salesforce CRM
- Maintained accurate pipeline data and clean handover between qualification and next-stage conversion
- Kept data hygiene consistent to support accurate forecasting

LEADERSHIP & COACHING

- Promoted into a leadership role onboarding and training new sales representatives
- Delivered structured coaching through live call observation and feedback
- Trained new starters on cadence management and CRM usage, shortening their ramp time
- Improved early-stage conversion rates across the team through targeted coaching

SDR RELEVANCE

- High-volume outbound prospecting and pipeline contribution
- Practical fluency with core SDR tools: Salesforce, Dialpad, Lusha, LinkedIn Sales Navigator
- ICP-based targeting and structured qualification
- Multi-channel cadence management
- Fast ramp-up and independent execution under KPI pressure
- Coaching and process-improvement experience
